CORPORATE PROFILE

NEX NIPPON
EXPRESS

NX SHOJI CO., LTD.

Role and Mission of NX Shoji

We at NX Shoji optimize commercial distribution and logistics in accordance with customer needs, add enhanced strategic service features, and support speedy and efficient operations. In this way, we contribute to the business success and enterprise development of our customers. It is in these functions that NX Shoji displays its unique role and mission as a high-performance composite trading company.

Logistics Equipment Sales and Construction

Physical Distribution Merchandise & Machinery Division

NX Shoji provides a broad range of services through its nationwide network, including facility construction and sales of materials and equipment required at logistics installations. Drawing on a wealth of experience and knowledge, we propose the best-suited materials and equipment for our customers, and also provide consulting and after-sales services. We are also focusing on procuring materials and equipment from overseas sources to help customers meet their cost-reduction objectives.

One-stop logistics solutions for our customers

Automation equipment and material handling

We provide one-stop solutions for enhanced productivity at logistics installations, from vendor-free selection to support for construction and operation.

Facility construction

We have an extensive track record in construction work at logistics facilities, including air conditioning installation, electrical work, and various interior construction work.

Packaging materials

Drawing on design capabilities developed over many years and our ability to procure from overseas sources, we provide environment-friendly packaging materials.

Global Procurement

Global Trading Support Division Logistics Support Business Unit

In order to support SCM across multiple countries, we at NX Shoji, as a partner to our customers, are working to strengthen the functions of a chain of commercial and logistics services. Especially in global procurement, we deliver fast and accurate services through the comprehensive strengths of the global NX Group network.

SCM support through comprehensive strengths

Global network

Taking the world as global supplier, we propose optimized international procurement proposals for our customers.

Import and export agent

NX Shoji serves as importer and exporter agent for onerous customs clearance procedures and settlement operations.

Just-in-time (JIT) system

Our just-in-time system achieves JIT delivery through a seamless service covering all supply chain processes.

Packaging (machinery and parts)

Logistics Support Business Unit Global Trading Support Division

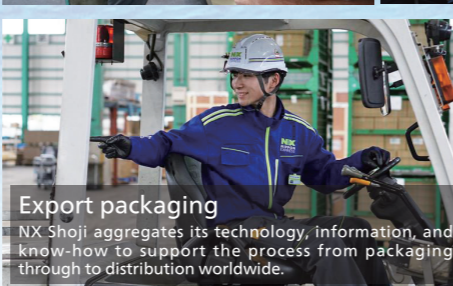

Packaging technology plays an important role in improving overseas export and supply chain efficiency and cost reduction. Drawing on packaging technology accumulated over the course of half a century and taking into account a wide range of perspectives, NX Shoji offers the optimal packaging for each product. In addition to packaging, by developing and operating an in-house warehouse management system adapted to customer needs, we provide high-efficiency, high-quality services.

SCM transformation through packaging solutions

Warehouse management system

We have developed an in-house warehouse management system for the comprehensive management of the receipt, inspection, storage, and issuance of goods.

Export packaging

NX Shoji aggregates its technology, information, and know-how to support the process from packaging through to distribution worldwide.

Use of the latest technology

We utilize the latest logistics equipment. We also develop proprietary equipment aimed at automation and saving labor.

Vehicle Maintenance and Production

Maintenance & Manufacturing Division

We have maintenance plants and service stations all across Japan, and we provide services to support our customers' logistics, from check-ups and repairs of vehicles and construction machinery to vehicle safety inspections and container maintenance. Furthermore, aiming to create novelty in logistics, NX Shoji engages in the development, design, and manufacture of various kinds of trailers, containers, and vehicle mounts for logistics applications. We also produce one-of-a-kind specially mounted vehicles in accordance with customer needs and challenges, opening up new possibilities in logistics.

Contributing to society through logistics of unshakeable dependability

Maintenance of special vehicles and heavy equipment

We handle the maintenance of not only large vehicles but also crane cars and special transportation vehicles.

31-ft railway wing containers

A popular product that we have patented. Also contributes to modal shifting.

Design development

We provide one-stop solutions using the latest technology from Japan and overseas for the design through to the manufacture of special vehicles.

Energy

Petroleum Division Liquefied Petroleum Gas Division

NX Shoji is working to ensure a stable supply of energy in support of logistics, industry, and daily life activities. Our petroleum business counts among a small number of enterprises that feature both trader and supplier functions. Meanwhile, our LP gas operations with a 60-year history accommodate a wide range of applications ranging from general household use to industrial use.

An energy supplier for industry and daily life

LP gas

Our LP gas operations function as energy supplier for daily life activities jointly with community-based services.

NX Shoji bunker barge "Aiko Maru"

As a supplier of ship fuel oil for the NX Group, we provide high-level bunker services to domestic and foreign customers.

Eco stations

Eco stations offer LP gas as automotive fuel.

Real Estate

Real Estate Sales Division

We have expanded our general real estate business, establishing facility management, real estate brokerage, and architectural design and maintenance of mainly logistics facilities as our core business. We are required to grasp the needs of landowners and building owners, and to make effective use of assets while increasing their value. With wide-ranging knowledge and experience built up over the years, our team of experts meets the needs of the times and the wide-ranging demands of customers.

Our expert team meets customer needs

Architectural design and supervision

We meet a wide range of needs from planning, consulting, and surveying and diagnosis to design and supervision of warehouses and other logistics real estate facilities, as well as office buildings, apartment buildings, and research facilities.

Brokerage and consulting

In partnership with owners, we propose effective ways of using assets.

Facility management

We support owners in maintaining the value of their assets.

Insurance

Insurance Division

NX Shoji is also promoting insurance services as an industry-leading corporate agency. We have more than 60 customer contact points nationwide, providing order-made insurance solutions in line with customer requirements. For corporate customers, we offer disaster and accident insurance along with products based on risk analysis such as the Automobile Accident Reduction Program.

Providing against risks surrounding corporate activities
